

J. VILA

FACTORY

Since 1980 J. Vila factory has been producing chandeliers, wall lamps, floor lamps, table lamps and other types of lightning fixtures of classical, neoclassical and modern designs.

Our specialists have many years of experience in working with various types of materials, including brass, bronze, ceramics, crystals and others. But as the world changes, so do we by implementing latest technologies, new production techniques and finishes.

We specialize not only in producing the catalogue items, but also realize different individual projects. Majority of our products can be altered in sizes and finishing colors.

And, if needed our experienced professionals can assist in realizing your own idea into life, so our clients can have what they would truly like.

HANDCRAFTED

Each and every item is hand-crafted by our specialists with more than 20 years of experience.

GALVANIC PLATING AND COLOURING

The factory's manufacturing capacity allows us to perform different types of galvanic plating and colouring finishes. After the item is plated or coloured, it is covered with a special protective coating and then baked.

PRODUCTION QUALITY CONTROL

Before the items are shipped to our clients, each and every one of them is checked and tested at the factory for any possible flaws.
